PRESENT:

International **S**ymposium  
on **S**olubility **P**henomena  
and Related Equilibrium Processes

**15-20**  
**JULY 2018**

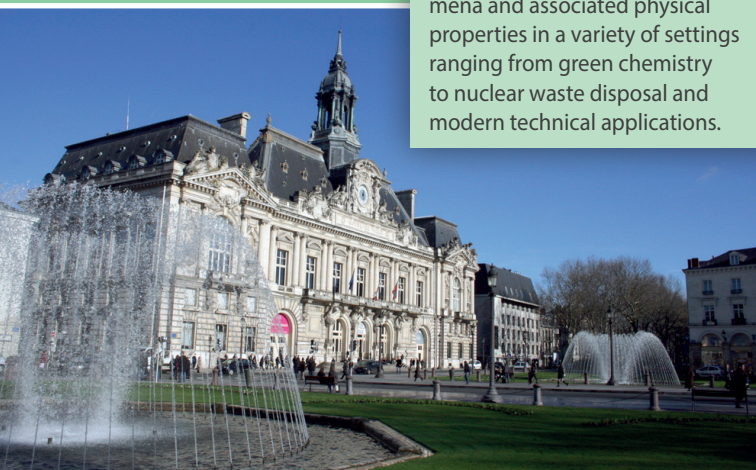

**TOURS, France**  
**Hôtel Oceania l'Univers**

The **International Symposium on Solubility Phenomena and Related Equilibrium Processes**

(ISSP) is an established biennial IUPAC symposium organised by the Subcommittee on Solubility and Equilibrium Data gathering international experts on solubility studies or related subjects to exchange new research and concepts.

ISSP is addressing the general importance of solubility phenomena and associated physical properties in a variety of settings ranging from green chemistry to nuclear waste disposal and modern technical applications.
